

# **Beelines Consultation Map**

## User guide

Transport for  
Greater Manchester

## What is Beelines?

Beelines is a cycling and walking infrastructure proposal for Greater Manchester. You can view the proposals on MappingGM. The map shows the existing and proposed crossing points needed to open up communities for cycling and walking across Greater Manchester. It also shows the proposed routes for the Beelines network and initial proposals for roads where segregated Dutch-style cycling lanes could be built.

The first iteration of the map was published in June 2018. It has been developed in collaboration with all 10 Greater Manchester local authorities and co-ordinated by Transport for Greater Manchester. The map will be updated quarterly with new information, and public engagement with this first draft of the proposals is actively encouraged.

## How can I access the map?

To access the website, visit <https://mappinggm.org.uk/beelines>. Alternatively, from the [MappingGM homepage](#), click on the 'Maps' button at the top, and choose 'Beelines' from the dropdown.

The homepage will provide you with a range of information about the consultation, including contact details for further information, and the privacy notice.

To access the map and make a contribution, click the 'View the map' link at the top of the screen. In order to access the map, you will need to confirm that you have viewed the terms and conditions of use, and are aware of our privacy notice.

Beelines is a cycling and walking infrastructure proposal showing existing and proposed crossing points needed to open up communities for cycling and walking across Greater Manchester.

The first iteration of the map was published in June 2018. The map shows the existing and proposed crossing points needed to open up communities for cycling and walking across Greater Manchester. It also shows the proposed routes for the Beelines network and initial proposals for roads where segregated Dutch-style cycling lanes could be built. It has been developed in collaboration with all 10 Greater Manchester local authorities and co-ordinated by Transport for Greater Manchester. The map will be updated quarterly. Public engagement with this first draft of the proposals is actively encouraged.

**Contact the Cycling and Walking team**  
If you have any comments or queries about the plans please contact via email.

**Contact the mapping team**  
If you have any queries, comments or updates to make regarding the map, then you can get in touch via email or via Twitter.

## What do the different buttons and tools on the map mean?

A range of tools are provided to help you with navigating the map and the information on it. These are detailed below. As you hover over most of our tools, a small title or description will appear.

Tool image	What does this tool do?
	Allows for you to zoom in (+), zoom out (-) and zoom to an area. To choose an area to zoom to, click on the third button, and then hold down the left mouse button and drag to cover the area chosen. Alternatively, a mouse scroll will also zoom in and out.
	If you have zoomed in too far, and want to zoom out to see all of Greater Manchester, or if you are not centred on Greater Manchester, this button will change the view to cover all of Greater Manchester.
	<p>When clicking this button, a search box will open allowing for you to search for place names, addresses or postcodes. It does not work for searches of things, e.g. 'post office' will not return any results. Choose from one of the provided options and the map will zoom to and centre on that location. If only one search result is available, the map will automatically zoom to and centre on that location before you have finished typing in the location.</p> <p><b>PLEASE NOTE:</b> this searches for places, not specific Beelines proposals or existing routes / crossings.</p>
	This button allows for two options: to print the current on-screen view; or to save the current on-screen view as a PDF (this functionality works better in Chrome and Firefox, for example).
	<p>This tool allows you to make a comment on the proposals. You can do so by clicking on this button, then clicking anywhere on the map where you would like to make a comment.</p> <p>As soon as you click on the map, a comment box appears. Please fill in your details and your comment, and then click 'Submit comment'. Your comment will be submitted and a message will be sent to your email account noting your submission ID – a unique code related specifically to your comment.</p> <p>If you have clicked the map, but do not wish to make a comment, or have made a mistake and want to return to the map, click 'Cancel comment' and your comment will not be logged.</p>

**Tool image****What does this tool do?**

If you have started to write a comment, but then realised that you did not want to submit a comment here, you can go back to the comment submission button on the left hand side of the page. The submission button will have changed to a trashcan. Clicking this will delete the comment you have made thus far.

Once you have made a comment, this tool allows you to search for yours or others' comments. You can do this by adding in the submission ID you will have received after submitting a comment. A small box will appear at the top of the screen allowing you to input this submission ID. Once you click enter, you will be taken directly to the comment on the map.

This is a measurement tool. As you hover over the tool button, the option to create a new measurement appears. Once you have clicked this, the cursor will change to a hand with a small red dot. To measure a distance, choose the start and end point using a left mouse click. On each click, the latitude / longitude and easting / northing of the place will be presented on the left hand side of the screen. On the second click, a path distance in metres will be presented. On the third click - and all subsequent clicks - a path distance and a total shape area in both square metres and hectares is presented. To cancel the measurement and start again, click the 'Cancel' option. To finish the measurement, click 'Finish measurement'. A popup will then appear offering the options of centring on the area, or deleting the shape created.

This tool is provided to allow you to search for potential layers, and is available in the top right hand side of the screen. As you begin typing a description or name of a layer, layer options will be presented below. Choosing an option adds this layer to the map, and shows where this layer is available in the 'Layers' tool.

The layer selector tool is automatically turned on - as you open the map, the tool will be open. If it is not, this symbol will appear. To open the layer selector, click this button and a range of layers, or layer themes, will be presented.

## Tool image

## What does this tool do?

The layer selector will normally open looking like this. The different data layers are available in broad thematic areas. The Beelines data is available under the 'Beelines' theme.

To choose all data under this layer theme, click the bracketed number to the right hand side of the theme. If any layers within that theme are already turned on, a single click will turn all layers off, and a subsequent click will turn all layers on.

To expand the layer theme to see the layers within, either click on the name of the theme, or the small '+' to the left of the layer theme.

To select an individual layer – i.e. to turn it on or off – click on the tick box or the radial button to the left of the layer name. To find out more about the dataset, including a description and a link to the source data, click on the small 'i' button to the right of the layer name. Below the layer name is a legend, showing how that data layer will appear on the map.

To close the layer selector tool, click this button in the top right of the layer selector.

The filter tool allows you to look at subsets of the current data layer. For example, the 'Crossing routes' layer includes a breakdown for the types of route to Beelines, Existing routes, Proposed routes and Big Ticket routes. Selecting one of these will filter the dataset so that only the data matching the criteria are shown on screen.

The information button is available at the side of every data layer. When you click this button, more information about the layer appears in a popup. This will include both a description of the dataset, and a link to sources, where possible.

## How can I leave a comment?

If you wish to leave a comment on the proposals, you will need to use the comment button identified above. Click the comment button, then choose an area on the map where you would like to leave a comment.

In order to leave a comment, you will be asked to provide an email address, your name and your postcode. This will allow us to provide you with a submission ID number, which you can use to track or view your comment.

In submitting your comment, ensure you are aware of our privacy notice, which is available on the front page of the map (<https://mappinggm.org.uk/beelines>).

Your email address will be used to send you an email confirming receipt of your comment. This email will include a submission ID – a specific number or code that identifies your specific comment. If you have any queries about your comment, please ensure you provide the submission ID you receive as part of your correspondence with the Cycling and Walking team.

**PLEASE NOTE:** Once you have submitted a comment, you will not be able to make a direct change to it through the map. You will need to contact TfGM, who will verify that the comment came from you (via your email address, name or postcode) before proceeding. To make a change to your comment, you will also need to provide your submission ID.

## What happens to my comment once I have submitted it?

TfGM will validate any comments received through the system, to remove any offensive or inappropriate comments. This process will only take account of the comment, and not reference any of the data collected about you. Once the comments have been validated, they will be pushed live, on average once a week.

As a result, your comments will not immediately appear on the website. If your comment is not visible on the website within a week of submission, please contact the cycling and walking team directly at [cyclingwalking@greatermanchester-ca.gov.uk](mailto:cyclingwalking@greatermanchester-ca.gov.uk).

### **How can I see my comment on the website?**

Once your comment has been validated and added to the map, you can view it by choosing the 'Approved comments' layer in the layer choice panel on the right hand side.

Alternatively, if you want to jump straight to a specific comment, use the comment search tool identified above.

### **Where can I find out more information about Beelines, or suggest a change to the map?**

For more information on the map, including any questions you may have about the data or consultation, contact [cyclingwalking@greatermanchester-ca.gov.uk](mailto:cyclingwalking@greatermanchester-ca.gov.uk). Alternatively, find out more by visiting the [TfGM Beelines page](#) or [joining the conversation on Twitter](#).

### **I am having trouble viewing the map. What do I need to do?**

There may be a number of reasons why the map isn't working, including an issue with our networks or high demand and usage of the maps. You may wish to try refreshing your browser again.

If you are still having a technical issue in accessing the map, please contact [mapping@greatermanchester-ca.gov.uk](mailto:mapping@greatermanchester-ca.gov.uk).

### **I like MappingGM. What else is there?**

MappingGM is managed by the Greater Manchester Combined Authority, and hosted by Salford City Council.

It has been designed to provide mapped information about Greater Manchester to the public. We have a range of maps available, covering areas as diverse as planning, housing, infrastructure, socio-economics, demography, public services, ecology, transport, culture and heritage.

If you want to find out more, contact [mapping@greatermanchester-ca.gov.uk](mailto:mapping@greatermanchester-ca.gov.uk), [check out our Twitter feed](#), or [have a click around the MappingGM website](#).
